Revision Stem

PRIMARY CEMENTLESS ACETABULAR CUP

- **Uncemented porous coated cup**
- **Range from 40 mm till 62 mm**
- **Press fit cup**

PRIMARY KNEE

- Designed flexion angle up to 150°
- The product supplies both posterior stabilized and cruciate retaining implants
- Open intercondylar design reduces the bone resection
- Deeper trochlear recess enables good contact with patella in high flexion and prevents dislocation
